Work Experience:

Web Developer

February – October 2017

Moore-Wilson New Media Ltd., Salisbury

- Developed pitch demo sites for biddings
- Developed functional and aesthetic Drupal 7 & 8 sites following design prototypes, and using proper coding practices and efficient development ideas
- Also developed Wordpress sites for clients and ensured with sites developed, relevant documentation and notes were made to help with website support: post-deployment and launch
- Was mentored by senior developers throughout my time there, and worked very collaboratively with other developers and project managers
- Some sites I played a major role in developing include Team Archie (<http://www.teamarchie.org>), North Essex IAPT (<https://www.northessexiapt.nhs.uk>) and Noclor (not launched yet).

Production Operative

January – February 2017

PEI Genesis, Southampton

- Worked in the engineering department where bespoke electronic components were made and assembled.

Signalling Maintenance Operative

May 2015 – December 2016

Network Rail, Eastleigh

- Part of a maintenance/fault resolution team looking after all signalling related equipment and assets (on and off track) between Oakley and near Bournemouth

Website Coordinator/Developer

October 2014 – April 2015

Community Playlink Children's Charity – Northam Estate, Southampton

- Developed a new website for this children's charity using Wordpress (www.community-playlink.com). Officially, I stopped working there in 2015, but I still continue to provide support where required.

Design Engineer

April – November 2013

ZTE Limited

- Made AutoCAD designs of telecoms equipment rooms, equipment and site layouts for pre and post installation operations.

Site Planning/Design Engineer

May 2012 – March 2013

Huawei Technologies Co. Ltd.

- Provided technical advice and recommendations on pre-installation of telecoms equipment and planning of new site layouts to meet clients' requirements.

Microwave Transmission Planning Engineer

July 2011 – May 2012

Huawei Technologies Co. Ltd.

- Part of a team in networking and telecommunications support services department responsible for the successful planning and design of microwave transmission networks for telecoms operator Bharti Airtel.

Web Administrator/Developer

June 2010 – July 2011

Genio Technologies Ltd. (formerly Cerebro Solutions)

- Developed Joomla websites for diverse clients and was responsible for the daily administration of their bulk messaging web application, SMSTorrent (www.smstorrent.net)
- Engaged directly with clients and subscribers of SMSTorrent (5000+ at the time), also preparing HTML Help Tips sent as emails to help users familiarize with the app better.

Software Developer Intern

March – November 2008

NetPoint Mobile Technologies Limited

- Worked with the software development team to develop a University/academic utility mobile application.
- Developed the application's GUI using C# on the .NET platform
- Was the team's focal point in charge of technical reporting.

Education and Qualifications:

Certified Internet Web Professional [CIW] Certifications

- JavaScript Specialist May 2017
- Advanced HTML5 & CSS3 Specialist February 2017
- Web Foundations Associate December 2016

University of Nigeria

2001 – 2007

BEng (Hons) Electronic Engineering

5 GCSE O-Level (English, Maths, Chemistry, Physics, Biology)

1997 – 2000

Interests

Cool websites, technologies and gadgets, professional gaming, cars, and fashion.
